STUDENTS- FUTURE OF NATION

'Strive not to be a Success, but rather to be of Value'
- Albert Einstein

Dear Students,

You are the future of our Nation. The torchbearers of our traditions, culture and our social fabric. There may emerge questions in our minds about value systems and its definition with respect to our lives. Values are a set of belief systems that influence and guide us in our day to day decision making processes. They further aid us help the needy, respect our elders, serve the community. Values play a crucial role in the behaviour of human beings. Our behavioural patterns are guided by our values that we start to build right from the early days of our lives. Values are imbibed in us throughout our childhood helping us navigate life situations that require deep perspective and empathy. We must learn to inculcate good values in our lives.

Values that encourage us to instill objectivity and nourish the seeds of equitable respect for everyone based on human dignity and not on the scales of monetary status, are important. We must develop deep empathy and compassion for everyone and learn to elevate ourselves to serve the society with dignity and respect. We must treat people as we want to be treated by them. Our value system inspires us to be truthful and ethical in our approach towards life. One must always listen to his or her conscience and translate the message in their work at all times. Our value systems help us to overcome difficulties and act as a support system to stir through life challenges. Human values like love, compassion, kindness, honesty and service must be practiced with sincerity.

We must aspire to be a World Leader. We must follow our value systems and be the change that we want to see in the world! We must feel and understand the other persons' emotions and be truthful to our conscience and work diligently towards achievements that brightens the lives of people. There is always a difference between a 'Human Being' and 'Being Human'.

***Wish you all
a Happy Learning !***
