

FIFA WORLD CUP Brasil

The 2014 FIFA World Cup is the 20th FIFA World Cup - the tournament for the association football world championship, which took place at several venues across Brazil.

It began on 12th June, 2014 and concluded on 13th July, 2014 with an exciting final match. It was the second time that Brazil hosted the competition, the first being in 1950. The national teams of 31 countries advanced through qualification competition to participate with the host nation, Brazil in the final tournament. A total of 64 matches were played in 12 cities across Brazil in either new or redeveloped stadiums. For the first time at World Cup finals, match officials used goal-line technology, as well as vanishing foam for free kicks.

All world champion teams since the first World Cup in 1930-Argentina, Brazil, England, France, Germany, Italy, Spain and Uruguay- qualified for this competition.

Title holders. Spain, was eliminated at the group stage after losses in the first two matches. All seven previous World Cup tournaments staged in America (four in South America and three in North America) were won by South American teams.

12 venues (seven new and five renovated) in twelve cities were selected for the tournament. The venues covered all the main regions of Brazil for creating more evenly distributed hosting than the 1950 finals in Brazil. Consequently, the tournament required long-distance travel for teams. During the World Cup, Brazilian cities were also home to the participating teams at 32 separate base camps as well as staging official fan fests where supporters viewed the games.

The first round, or group stage, was a competition between the 32 teams divided among eight groups of four, where each group engaged in a round-robin

tournament within itself. The two highest ranked teams in each group advanced to the knockout stage. Teams were awarded 3 points for a win and one for a draw.

The total prize money on offer for the tournament was confirmed by FIFA as US\$576 million (including payments of US\$70 million to domestic clubs), a 37 percent increase from the amount allocated in the 2010 tournament. Before the tournament, each of the 32 entrants received US\$1.5 million for preparation cost. Once at the tournament, the prize money was distributed as follows:

- US\$8 million – To each team eliminated at the group stage (16 teams)
- US\$9 million – To each team eliminated in the round of 16 (8 teams)
- US\$14 million – To each team eliminated in the quarter-finals (4 teams)
- US\$20 million – Fourth placed team
- US\$22 million – Third placed team
- US\$25 million – Runner-up
- US\$35 million – Winner

After several rounds of stiff competition, the final FIFA battle was played between Germany and Argentina. It was a high voltage competition witnessed by the whole world where Germany emerged as the FIFA World Champions, 2014

EDITORIAL

The Magic of Politeness

Dealing with people is not easy. Business deals, personal interactions, workplace intermingling- all require certain conversational skills. One has to get

along with the other person. Team work maybe required more than often. All these communication forms require a person to be polite. Rudeness can make business deals difficult to settle, or even at personal level one may face rough weather if one offends the other person.

World over, many business or trade transactions and diplomatic ties are carried out on a large scale. Such dealings require a person to be polite and courteous to get the work done. If one is polite one can build up friendly ties.

Politeness

Civilized; showing regard for others; a courteous manner.

Politeness indeed pays off in many ways. People are genuinely impressed in the manner we conduct ourselves. They reach out to us and therefore we can communicate better. Differences can be settled easily. There are several institutes which train a person on how to be polite.

Maintaining proper etiquette and speaking properly to a person without offending him or her is politeness. One must not be rude or offensive. One must use proper words to convey something. Foul language can put off a person. One has to be extremely careful about the words, while conveying something. Any conversation with politeness imbibed will lead to a great interpersonal relations.

Free Dental Camp

A free Dental Camp was organized on 14th June 2014 by Axis Dental at our DMCS, Vidyanarayapura campus. The activities for the camp was

organised by a team of dedicated staff members from our school. Mr.Vasudev, Mr.Ravindra Shukla, Mr.Nagendra, Ms.Gomathi and Ms.Vrinda (Project Manager, GCC) were earnestly involved in making the activity a success. There were two teams of doctors with attenders. The doctors conducted a basic dental check-up and thereby referred for a follow up session to the nearest branch with an option of availing their services at a discount. The free dental camp began at 10:00 am in our newly extended floor with all necessary facilities for the Camp team and visitors. There was great response and participation witnessed for this activity. The Doctors and the attendees were in the campus till 5:00 p.m. There were around 95 visitors from all age groups. It was a successful and a memorable event for the DMCS fraternity.

BREAST CANCER Awareness Programme

DMCS, Vidyanarayapura and Lions Club organised a very informative and educative Breast Cancer Awareness Programme at the DMCS,VP campus on June 28th 2014.

Reputed doctors from Kidwai Institute Of Oncology were present to assist and guide in the screening and conduct of thorough physical examination.

After the formal inauguration and lighting of the lamp by our esteemed Chief Guest Dr. Ibrahim and respected organisers from the Lions Club, our Principal Mrs. Balasundari gave a warm welcome and brief introduction of the programme to one and all present there.

This was followed by an interesting session by Dr.Ibrahim giving details of preventive measures and cures for both breast and cervical cancer. There was also an interactive session for the

THINK PINK
October is
Breast Cancer
Awareness Month!

SUPPORT THE FIGHT!

audience to clarify any doubts/queries.

Physical examination was conducted where female visitors from the crowd were given a chance to thoroughly examine themselves by the esteemed set of doctors. The doctors were very co-operative and patient in making the female visitors feel very comfortable.

The camp was an eye-opener for many women who were ignorant of many facts related to this massive silent and killer disease. Since the whole initiative

1 in 8
WOMEN
WILL BE DIAGNOSED WITH
Breast Cancer
IN THEIR LIFETIME

was free of cost, it was greatly beneficial to many women who were from the under privileged class as well.

The teaching and non teaching staff of DMCS, VP also benefitted from this great opportunity.

The programme concluded with memento presentation to all our elite guests including the organisers from the Lion Club, by our Principal. We are proud to successfully organize such a rewarding and informative event.

VISION with You

Money Management and personal finance is one of the most sensitive issues to be handled with your children- it forms an integral part of a Child's development process. It is never too late to teach your child about the value of money, budgeting and saving. There are different degrees of knowledge and responsibility that your child may have towards his/her personal finance. Young Children have a quaint desire of creating their own "Piggy Bank" – a very humble yet an effective way of a child's understanding towards money management. Though they may never realize the value of the amount they have collected, it would inevitably sow the seeds of saving in these young hands. It is always delightful to appreciate your children for every penny they add on to their piggy bank- your words of encouragement acting as a catalyst for earning interest in this wise habit.

As your child starts growing up, allowances for your child may become a part of your household budget. Family meetings concerning monthly budget may superficially involve the teenagers of the house. Partial decision-making by young children will expose them to judge and understand the discretionary income that the family would be spending for the month. Incase your child putforths a request for a monthly allowance, don't deny them the opportunity upfront. If the child displays a genuine interest for spending judiciously on himself, for small daily errands- the allowance may be granted. It will immensely help the children to appreciate how much the things may cost and eventually understand the value of their belongings and personal possessions.

There are innumerable daily chores and household tasks that can give an insight into money management for your child. A casual visit to a grocery shop, accompanied by your child will make sure that your child observes and learns the small nuances of daily purchases and expenditures. A visit to a bank with your child is another good option of exposing your child to money management and making him/her realize the importance of saving and budgeting in personal finance. Accompanying your child to a nearby supermarket and giving him/her an opportunity to handle the billing at the cash counter are very small ways to ensure great results.

The value of money is best realized by a child when he or she saves it and consequently spends it for their personal needs. However, let's not forget that our attitude, values, and beliefs present the best role model for our young children, when it comes to money management. Borrowing should be vehemently discouraged and we as elders should abundantly display this attitude in our obligations and duties. No matter how much of effort we put in for a formal education on personal finance to children, it is pre-ordained that they will emulate our steps as torch-bearers. Money Management, if handled with ease and precision, will definitely empower us to guide our kids to financial freedom and take a significant leap to adulthood.

DR. JOSEPH V. G.

CHAIRMAN

THE AWAKENER

Mrs. R. Balasundari,
Principal, Vidyaranyapura

Let me start off by asking you a few questions –

Who is the Prime Minister of India? (Fairly easy?)

Who are the ministers of our neighboring countries, the nature of their governance, their political affiliations? (Not too sure?)

Alright, let's come back to our own state. How many provinces is our state divided into? What is their ethnicity? What are the languages spoken in each of these provinces? (May be you could give a try?)

You might want to just brush it off thinking "I'm not too interested in politics, what does it have in it for me anyway!"

Dear children, it is not just politics, it is also the current state of affairs in our country, and all that is happening around – politics, sports, agriculture, the happenings in and around your locality, city, state and country. Which is that one medium that gives you all the information we are talking about here and more?

No, it's not your text books, not in your syllabus... then which one is it? It's the "NEWSPAPER"

Yes, the television has abundant

channels going on and on, about all that is happening all around. But how interesting do you find it when compared to the Bollywood or Hollywood numbers and shows that are also playing in parallel?

Boring as it may sound, there is no other savior than a daily newspaper that thankfully seems to be available everywhere. You sure must have come across your grandparents or great grandparents who might not be as literate as the generations below, might not be graduates or even pre university pass outs. But the volumes of stories and details they have to tell you about politics, sports, gardening, zoology, anthropology will amaze you. For most of them, a morning would not be complete without a hot beverage in one hand and the "awakener" – their dear newspaper in the other!

Children, it is not without reason we have a programme in school termed "Newspaper In Education". The alarming rate, at which this habit of reading a newspaper is dying, is really causing concern! Although this was earlier believed to be an extension to the education a school provides, it is no more the case.

The text books you read, learn and are evaluated on are an essential part

of the school curriculum, within the boundaries of the syllabus prescribed by the board. This will definitely prepare you for your next course in the academic ladder. But what is the plan for your professional and social progress? What is it that will prepare you for the life ahead? While honing academic and co-curricular skills is one part of development, constantly keeping your general knowledge up to date is an integral part of preparing for life and also a key factor that will build your self-esteem.

It is with this intention that newspapers have been "introduced" in school. It is for you to utilize this opportunity and make it a part of your routine.

It might not be very easy to read through a black-and-white, small lettered collection of "stories"! But begin with it for 15 minutes every day; I am sure you will fall in love with it! This is definitely a habit you should fall in love with!

It cannot be emphasized better than summarized in the words of the great American social reformer, Henry Ward Beecher – "The newspaper is a greater treasure to the people than uncounted millions of gold"

EDUCATION should not be a Business Product

-Dr.A.P.J.Abdul Kalam

Nikhil Ranganath - IX

We the students of class VIII, IX and X had an opportunity to meet Dr.A.P.J.Abdul Kalam at Ayyappa School at its Silver Jubilee celebration. Here are a few excerpts from his speech where he addressed over a thousand students from different schools. Mr.D.V.Sadananda Gowda the union Railway Minister was also present to grace the occasion.

Opposing the commercialization of education, former President Dr A P J Abdul Kalam said it should not be made into a business, but imparted by good teachers.

“Education cannot be a business product or system. Education at the primary level has to be delivered in an integrated way by great teachers through good syllabus and promoting affinity between parents, students and teachers.”

“It is not a great building or a great facility or a great advertisement which

gives quality, but lovable education and great teachers do,” Dr.Kalam told at an interactive session with the students and teachers. Dr.Kalam gave the example of how his own school days were happy in the thatched Rameswaram Panchayat Primary School despite poor infrastructure and scanty amenities. He said his teachers, who had a mission to spread education, were loved by students and there was no dropout.

Having graced the post of the President of India besides working as an administrator and scientist, the ‘Missile Man’ said he loved teaching the most. “I have been a teacher, a scientist and an administrator. Now I have come to teaching again. If you ask me what I love the most, I would say it is teaching.” The 81-year-old travels regularly all over India to meet students.

He began his speech on ‘I am born with wings’ by asking students what they would be carrying with them after passing

out from school. When the students replied that it was knowledge, Dr. Kalam redefined it. “*Knowledge is creativity plus righteousness in the heart plus courage.*”

Presenting his vision of India in the next few years, he said, “We want a nation where crimes against women and children are absent and none in society feels alienated”. He also stressed on the need to have a nation where education with value system was not denied to any meritorious candidate because of societal or economic discrimination.

He looks forward to a nation where the rural and urban divide has reduced to a thin line. A nation where there is an equitable distribution and adequate access to energy and quality water. He also wished for governance that should be responsive, transparent and corruption-free. It was a lifetime opportunity for each of us to hear these “pearls of wisdom” from such a legend

Report On Awareness Programme On Geospatial Technology

Richitha.S - X

We the students of class IX and X attended a workshop at the Indian Institute of Science on Geospatial Technology. This workshop was conducted for 2 days, on the 26th and 27th of June 2014. It was an innovative theory cum practical workshop. On day one, theory classes were conducted and on the second day, we had the practical session.

Day 1: In the theory sessions we were enlightened on Mapping rockets and satellites. The session gave complete information on Mars Mission of India and Navigation systems. It was an interactive session facilitating students to clear doubts and better understanding of the topic. The GPS device was displayed and chance to use the same was given to few students. This gave a thrilling experience to the students.

Day 2: This session comprised of a field trip to Nandi Hills. We enjoyed this session as it was very interesting. On our way to Nandi Hills the vehicle stopped at certain locations, the real area was compared with the same in the map. We students learnt how different regions take different colours, when the image is taken from satellite. GPS devices were operated at different places, to know the elevation of the same. The session was fun-filled with learning. We carried back sweet memories in the form of photos

on our way back home from Nandi Hills. We also had the opportunity to visit Sir M. Vishweshwariah’s birth place, Mudelahalli.

The session concluded on day two with the distribution of Certificates.

We thank Prof. Perumal (IISc.) for organizing such an educative programme. Our sincere thanks to the Management -DMCS, Vidyanayapura for providing us this golden opportunity to attend such an informative and innovative workshop.

Know your Game

Badminton is one of the most popular games after Cricket and Football today. It is a racquet sport played by either two opposing players (singles) or two opposing pairs (doubles), who take positions on opposite halves of a rectangular court divided by a net. Players score points by striking a shuttlecock with their racquet so that it passes over the net and lands in their opponents' half of the court. Each side may only strike the shuttlecock once before it passes over the net. A rally ends once the shuttlecock has struck the floor, or if a fault has been called by either the umpire or service judge or, in their absence, the offending player, at any time during the rally.

The shuttlecock (or shuttle) is a feathered (or, mainly in uncompetitive games, plastic) projectile whose unique aerodynamic properties cause it to fly differently from the balls used in most racquet sports; in

particular, the feathers create much higher drag, causing the shuttlecock to decelerate more rapidly than a ball. Shuttlecocks have a much higher top speed, when compared to other racquet sports. Because shuttlecock flight is affected by wind, competitive badminton is played indoors. Badminton is also played outdoors as a casual recreational activity, often as a garden or beach game.

Since 1992, badminton has been an Olympic sport with five events: men's and women's singles, men's and women's doubles, and mixed doubles, in which each pair consists of a man and a woman. At high levels of play, especially in singles, the sport demands excellent fitness: players require aerobic stamina, agility, explosive strength, speed and precision. It is also a technical sport, requiring good motor coordination and the development of sophisticated racquet movements.

The beginnings of badminton can be traced to the mid-1800s in British India, where it was created by British military officers stationed there.

The court is rectangular and divided into halves by a net. Courts are usually marked for both singles and doubles play, although badminton rules permit a court to be marked for singles only. The doubles court is wider than the singles court, but both are of same length. The exception, which often causes confusion to newer players, is that the doubles court has a shorter serve-length dimension.

The minimum height for the ceiling above the court is not mentioned in the Laws of Badminton. Nonetheless, a badminton court will not be suitable if the ceiling is likely to be hit on a high serve.

EVENT @ GCC JOB FAIR @ GCC

From retail domain companies like Eureka Forbes, Essae Teraoka, Living Design, Selco Solar Light, Reliance Retail, etc. participated. From BFSI domain Cross Domain Solutions, HDFC Life, Indusind Bank, ING Vysya Bank, Reliance Securities, Sundaram Finance, Exide Life Insurance, etc. participated. From IT/ITES domain, Aegis Global, Artech info Systems, EMC Limited, Emart Solutions, Greet Technologies First Source Solutions, Infosys, Meghus, HGS, Mphasis, Orange Tech Solutions, Sun ITES, Ansata Computers Systems, Just Dial, Vertex Customer solutions etc participated. From the automotive sector, Arvind Motors, Leo Motors, Mandovi Motors, Pratham Motors, Ravindu Toyota, Trident Motors, etc. participated. Recruitment firms like Accrue India, Adecco India, ISOL Talent consultants, Suksh, TPHRM Solutions, Teamware, Tutelage, etc. participated. From NGOs/Others Samarthanam Trust, participated. From the Hospitality sector, Beautiful Journeys, Café Coffee day, The Zuri whitefield Bengaluru, The Four Fountain Spa, UB City Properties, etc. participated. The job fair witnessed a huge participation by job seekers from all over the state and from neighboring states like Tamilnadu, Andhra, Maharastra & Kerala.

Garden City College is an ISO 9001:2008 certified and NAAC accredited institution offering various programs in Science and Management Studies. As a part of corporate social responsibility every year Job Fair is organized for the benefit of fresh graduates and experienced graduates. This year the 11th Edition of Mega Job Fair was held on 12th July 2014. This year the Job Fair was organized in association with Karnataka Vocational Training and Skill Development Corporation (Central Placement Cell), Government of Karnataka on 12th July 2014. 48 Companies from Retail, Automobile,

Healthcare, Banking, Financial Service and Insurance, IT/ITES and Hospitality Sectors participated in the Job Fair. Over 4500 walk-ins were reported and 3138 candidates applied for various positions and 470 offers were made by these companies on the same day and about 600 candidates were shortlisted for further rounds. A booklet with company profiles and requirements was given to job aspirants to guide them in the Job Fair. The fair was inaugurated by Prof. N. Bharathi, Principal, Garden City College. From the Healthcare domain companies like Cryobanks, Omega Health Care, etc. participated.

EVENT @ DMCS- BANASWADI

DIABETES AWARENESS WEEK 30TH JUNE 2014 - 5TH JULY, 2014

DMCS Horamavu celebrated the Diabetes awareness week with great enthusiasm and earnestness. The morning assembly was marked by an Awareness speech on the life-threatening repercussions of Diabetes as a disease- also throwing light on Juvenile/ Childhood Diabetes. Charts, Diagrams, facts related to diabetes as a disease were displayed on the school bulletin and pin-up boards. A very informative talk session was organized

by Dr. Vani Murali- MBBS, DCH (Pediatrician) on Diabetes- its causes, symptoms, effects and prevention. Students also shared excerpts of talks by grandparents who have been diabetic, difficulties they faced and advise to the current generation. It was indeed a productive and rewarding experience for the DMCS, students.

Recipes

Easy Dosa Breakfast

Arts Club

Ingredients

Thick and spongy dosa - 2-3
 Onion - 2 finely chopped
 Tomato - 2 finely chopped
 Green capsicum - 1 finely chopped
 Oil - 3 tsp
 Red chilli powder - 1/2 tsp
 Garam masala powder - 1/2 tsp
 Salt as required

Method

Cut dosa into small pieces. Heat oil, fry 2 onions till it turns golden brown. Then add 2 tomatoes, chilli powder, garam masala powder and salt to taste. Cook till tomatoes turn mushy. Add capsicum and fry for a few seconds. Do not cook the capsicum fully. Add dosas and mix well till the dosa pieces get coated with the masala well. Serve hot.

Chapatti Rolls

Sujatha V- Faculty Member

Ingredients

Chapatti - 2-3
 Onion - 2
 Green chilli - 1
 Garlic - 2 cloves

Mixed vegetables

Beans - 6-7
 Carrot - 1
 Cabbage - 1/3 cup
 Capsicum - 1
 Sweet corn - 1/3
 Oil - 3 tsp
 Chilli powder - 1/2 tsp
 Coriander powder - 1 1/2 tsp
 Garam masala - 1/2 tsp

Method

Heat oil, fry onion, garlic and green chilli for a few minutes till onions turn pink. Then add all the vegetables, salt needed, chilli powder, coriander powder, garam masala and saute in high heat for a few minutes. The vegetables should be crispy.

Important - Chop all the vegetables finely. Take a chapatti, keep the filling in the middle and roll the chapatti tightly and secure it with a strip of aluminum foil, so that it is easy for the child to hold in the middle and eat. Instead of sweet corn, you can add button mushrooms or paneer, but do not add all the 3 together.
